Subnational Statistics using Administrative Data
NSSTA, MoSPI, Delhi-NCR, India – 23 Nov. to 4 Dec. 2026

National Statistical Systems Training Academy (NSSTA), Central Training Institute under Ministry of Statistics and Programme Implementation (MoSPI), Government of India is primarily fostering human resource development in the area of Official Statistics and related disciplines at the National/Sub- National as well as at the International levels.

Administrative data have emerged globally as a critical pillar for producing **timely, granular, and cost-effective subnational statistics**, particularly for decentralized governance for monitoring of Sustainable Development Goals (SDGs), and evidence-based policy formulation.

Various countries including Southeast Asian Nations, are increasingly focusing on strengthening the **use of administrative records generated by sectoral ministries** such as civil registration, health, education, labour, agriculture, and finance. However, challenges persist in areas such as **data quality, interoperability, metadata standards, legal frameworks, and integration with survey data**.

In this context, NSSTA proposes to organize a **Two-Week International Training Programme on "Subnational Statistics using Administrative Data"** for Statistical officials under the ITEC Programme, leveraging India's institutional experience and best practices in subnational statistics.
